

## UV LIGHT AND SEEDS

- SCHOOL: OSAGE CITY HIGH SCHOOL
- LOCATION: OSAGE CITY, KS
- FLIGHT PROVIDER: WORLD VIEW
- GRADES: HIGH SCHOOL

### STUDENT EXPERIMENT DESCRIPTION

For many years, humanity has wondered what will happen when the world ends. Most human existence will be long gone but, if something unexpected ever comes up, we will need to get food, such as seeds to wherever in space we go! For this reason, our experiment is to ship seeds through the Stratosphere. Our experiment includes testing and figuring out how seeds will get through areas with little light, harsh UV rays, and make it through the stratosphere pressure!
