

# TERRA ALTERING ATMOSPHERE EXPLORATION (TAAE)

- **SCHOOL:** BURNS JR/SR HIGH SCHOOL
- **LOCATION:** BURNS, WY
- **FLIGHT PROVIDER:** WORLD VIEW
- **GRADES:** MIDDLE & HIGH SCHOOL

## STUDENT EXPERIMENT DESCRIPTION

We're investigating whether the topography of an area affects the moisture and air quality. We hope our team will gain new knowledge about the air quality and study how humidity can contribute to different atmospheric conditions. During our investigation, we expect to see different topographic features that positively affect the amount of moisture in the air. Our group hopes to study the humidity compared to the topographic features to help our community with problems found in the atmosphere.
